

How to install - Mixer Abuse Reporter

Tampermonkey is a generic plugin for chrome that allows user created scripts to run in the background. The script created to gather the information necessary for this study needs to be saved and run by the moderator before data can be collected. There are two ways to install the Mixer Abuser Reporter. Google chrome is a required browser for the data collection in this study.

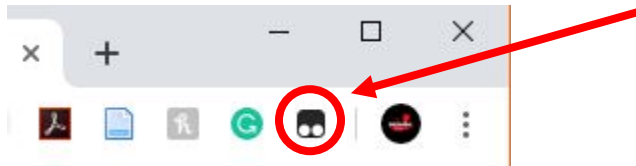

Install method 1

1. Download and install the chrome extension Tampermonkey.

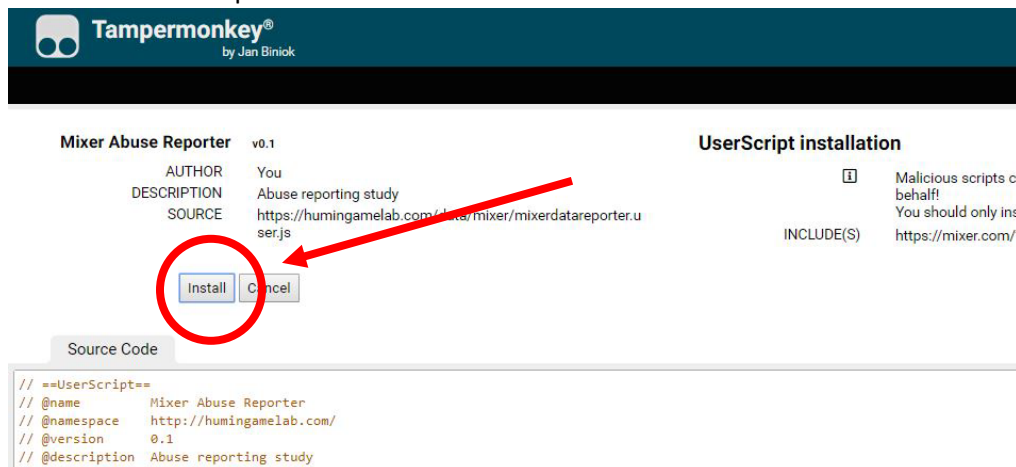

<https://chrome.google.com/webstore/detail/tampermonkey/dhdgffkkebhmkfjojeimpbldmpobfkfo?hl=en>

Once the plugin is installed, this icon should be visible in the top right-hand corner of the window.

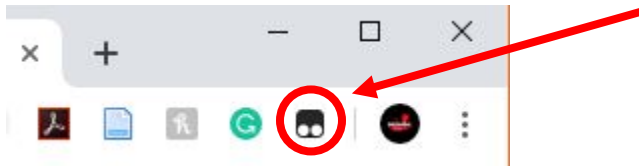

2. Click the link to open the script(or paste into the URL bar).
<https://humingamelab.com/data/mixer/mixerdatareporter.user.js>
3. Click install the script.

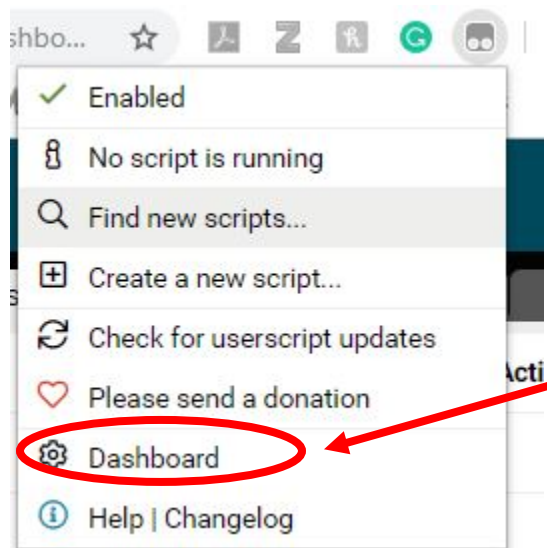

Once the script is installed, the browser window will turn **completely white**. This is normal.

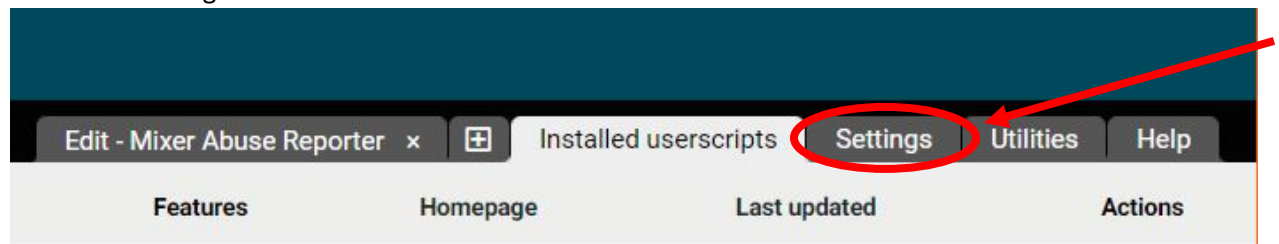

4. Left click on the icon in your google chrome hot bar to reach the drop-down menu.

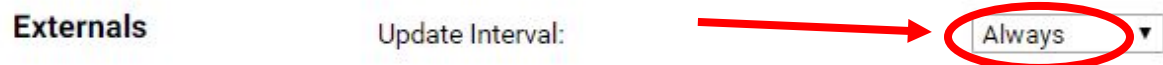

5. Select dashboard.

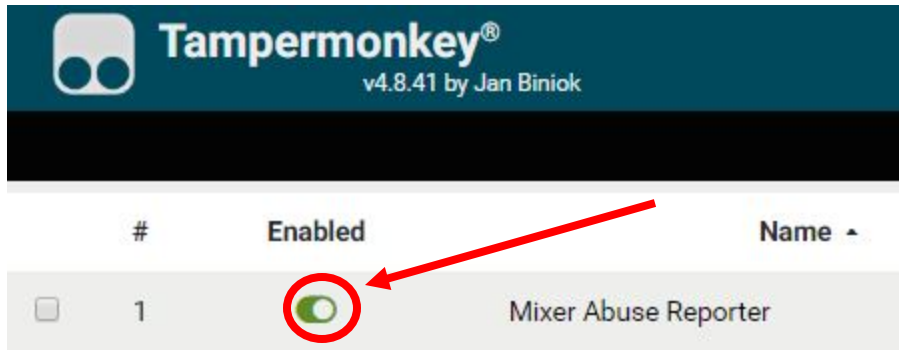

6. Select the settings tab from the dashboard.

7. Under the externals area of the page, set the check interval (set to always)

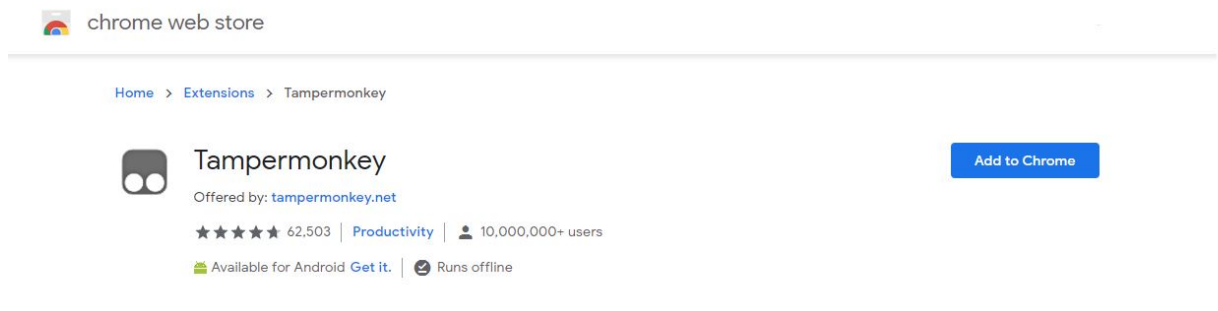

8. Click the Installed userscripts tab and confirm that the Mixer Abuse Reporter is Enabled.

9. Once that is done go to the "How to use the Mixer Abuse Reporter section of this document.

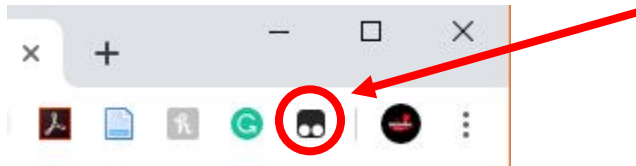

Install Method 2

1. Download and install the chrome extension Tampermonkey.

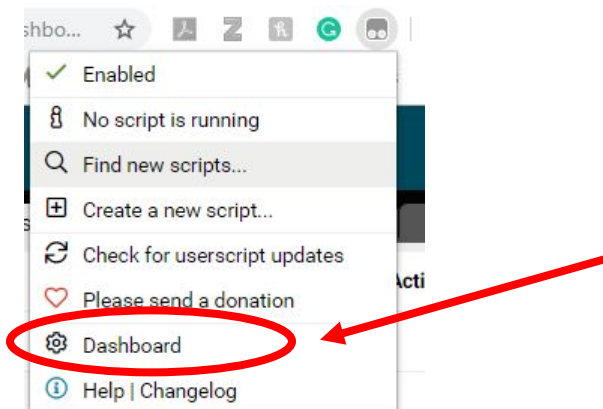

<https://chrome.google.com/webstore/detail/tampermonkey/dhdgffkkebhmkfjojejmpbldmpobfkfo?hl=en>

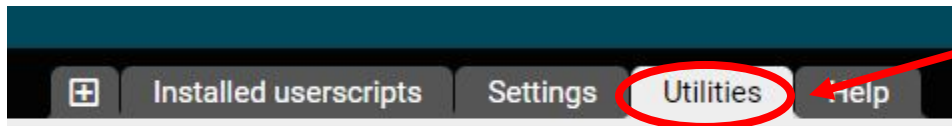

Once the plugin is installed, this icon should be visible in the top right-hand corner of the window.

2. Go to dashboard.

3. Go to Utilities.

4. Paste the link below into the given box.

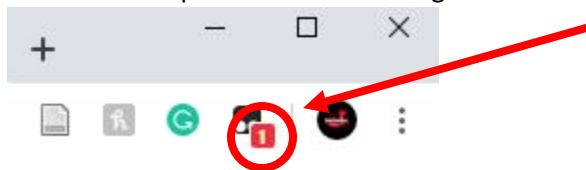

<https://humingamelab.com/data/mixer/mixerdatareporter.user.js>

5. Click import.

How to use the Mixer Abuser Reporter

1. Go to Mixer with google chrome.
2. Once the mixer website has been loaded, this number 1 notification will appear. It signifies the number of scripts active in the background.

3. Go to a channel and moderate the channel normally.
4. Once the moderator selects the report abuse button, the Mixer Abuse Reporter will automatically send all relevant information to us. An audio beep will play to confirm the data has been collected.
